

Virtual Security Management Data Sheet

Service Description

Kindus' comprehensive Virtual Security Management (vSM) solution is a way for businesses to access industry-leading cyber security knowledge in a flexible, cost-effective way. By having a seasoned security expert on a monthly retainer, your organisation can benefit from their years of security experience for a fraction of the cost of a dedicated in-house employee.

As well as access to an experienced security management professional, the vSM service also gives access to a wider virtual security team for hands on help with specialist cyber security challenges. Kindus can provide technical implementation support for a variety of platforms and technologies.

Key Features

- **Cyber Security Leadership and Governance**

Experienced cyber strategy, industry insight and big-picture thinking, whenever you need it.

- **Risk Lifecycle Management**

Complete ownership and management of your cyber security risks and threat landscape.

- **Incident Response Planning**

Help preparing for, dealing with and recovering from a variety of cyber incidents.

- **Technical Implementations and Challenges**

Technical expertise, whatever the challenge - from vendor selection to system and network configuration.

- **Compliance Management**

Manage the burden that various compliance frameworks place on your cyber security.

- **Security Processes and Procedure Development**

Good security needs a strong foundation in policy, tailored to meet your organisations needs.

- **Operational and Project Based Guidance**

Help with business-as-usual security tasks and specialist project-based engagements.

- **Audit Support**

Planning and support through internal and external audits.

- **Training and Awareness**

Help support your staff's security mindset with up-to-date tailored awareness and training.

Built Around You

A vSM service can only be effective when it works in harmony with the unique needs of your business, that's why Kindus' packages are tailored to your specific requirements. This means you get the cyber security assistance you need, when you need it.
